- E) Innoviti

Answer

B) Cashfree

Explanation

- The company's Token Vault Service offers both, saving tokenized cards and processing payments using tokenized cards as a single solution, eliminating merchants' need to look out for multiple payment partners.

Explanation

- Card-On-File (COF) tokenization is the process of replacing sensitive card information like card number, card expiry with a cryptographically generated random string, referred to as the card token.
