Which payment network has introduced the CVV (Card Verification Value) free payment experience for its tokenized cardholders?

- A) Visa
- B) Mastercard
- C) American Express
- D) RuPay
- E) Discover

Answer
D) RuPay

Explanation

- **RuPay** has now introduced the **CVV (Card Verification Value) free payment experience** for its debit, credit and prepaid cardholders who have tokenized their cards on the merchant application or webpage.
- Tokenization is a simple technology to secure card transactions without sharing clear or real card details with the merchants.
- **National Payments Corporation of India (NPCI)** was incorporated in **2008** as an umbrella organization for operating retail payments and settlement systems in India.
- This new CVV less experience ensures that the cardholder will not have to reach out to their wallet or remember any card details, if they have saved (tokenized) their card on the e-commerce merchant which supports this feature.

Explanation

- **RuPay**, India's own homegrown card network serving millions of Indians, is driven by the idea of solving and reducing friction for customers. RuPay went live on Card on File Tokenization in **2021**, in line with RBI's guidelines, for its domestic e-commerce transactions to ensure better security for all its cardholders.
