**What geographical indication (GI) tag recently received?**

- A) Salem Silk
- B) Salem Spices
- C) Salem Steel
- D) Salem Saffron
- E) Salem Sago

**Answer**

**E) Salem Sago**

## Explanation

- The **Salem Starch and Sago Manufacturers Service Industrial Cooperative Society Ltd** (popularly called as SAGOSERVE) received **Geographical indication tag or GI tag for Salem sago recently**
- Sago, derived from raw tapiocas, is in the form of small hard globules or pearls and is pearl white in colour.
- Tapioca is a major horticulture crop cultivated on nearly 3 lakh hectares in Tamil Nadu, producing 60 lakhs tonnes of the crop.
- Sago was produced first in Salem district, which is the main centre for sago production in the country, on a cottage scale basis.
- Sago is manufactured from the wet starch powder crushed from tapioca roots.
- The wet starch powder is used for producing sago and the dry powder has been used as a raw material for industrial purposes.

**Which Indian city recently became the second in the country to implement an emissions trading scheme?**

- A) New Delhi
- B) Mumbai
- C) Kolkata
- D) Hyderabad
- E) Ahmedabad

**Answer**

**E) Ahmedabad**

## Explanation

- The **Gujarat government announced that Ahmedabad** has become the **second city in the country to implement an emission trading scheme (ETS)** for particulate pollution that will help in regulating industrial emissions and reduce the state's pollution levels.
- Gujarat's forest and environment minister Mulubhai Bera inaugurated the first uniform auction for the Ahmedabad ETS market, distributing pollution permits online to all participating industries.
- The scheme empowers industries in the textile sector within the Narol and Vatva industrial clusters.
- The ETS is implemented by the Gujarat Pollution Control Board with the technical expertise of professors from University of Chicago, University of Yale, University of Warwick along with the Abdul Latif Jameel Poverty Action Lab (J-PAL) and Energy Policy Institute Chicago.

## Explanation

- The trading platform has been developed by **NCDEX e Markets Limited (NeML)**.
- An ETS, or “cap-and-trade” system, caps the amount of pollution allowed from regulated industries and allots permits to plants.
- Under ETS, industries with low abatement costs can make larger reductions in emissions and thus profit by selling excess permits
- Industries with high abatement costs can save money by buying permits instead of installing expensive equipment.
- The “cap-and-trade” system, similar to ETS, was introduced by the United States in the 1980s to reduce emissions of pollutants like sulphur dioxide and nitrogen oxides (NO<sub>x</sub>).
- ETS is an innovative market-based system that has the potential to transform the trade-off between environmental quality and growth, improving air quality with lower costs of compliance to industry.
