Strategic/significant value	Strengthens Sangli's position as a raisin hub, boosts farmer income, and enhances global competitiveness

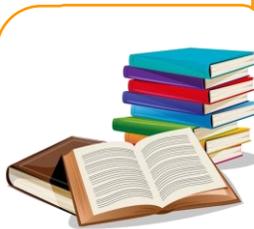

➤ **What is the primary goal of Russia's proposed lunar power plant project scheduled for 2036?**

- A) To power satellites orbiting Earth
- B) To supply energy to Martian missions
- C) To support the International Lunar Research Station on the Moon
- D) To launch a space tourism program
- E) To mine helium on the Moon

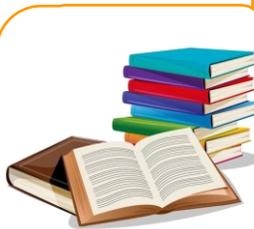

Answer

C) To support the International Lunar Research Station on the Moon

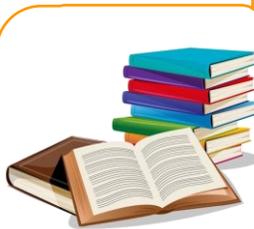

Event and Location:

- **Event:** Russia announces plan to build a lunar power plant by 2036
- **Location:** The Moon (International Lunar Research Station site)
- **Date:** Announcement made on 25 December 2025

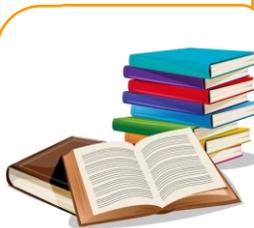

Mandates and Objectives:

- **Mandates:** Roscosmos, Russia's space agency, has announced plans to build a power plant on the Moon by 2036 to support long-term lunar operations in collaboration with China under the International Lunar Research Station project.

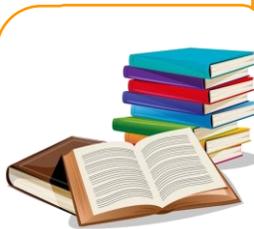

Mandates and Objectives:

- **Objectives:**
 - Provide continuous energy to lunar rovers, observatories, and permanent infrastructure
 - Enable long-duration human and robotic missions on the Moon
 - Reduce reliance on solar power in extreme lunar conditions
 - Reassert Russia's presence in global space exploration

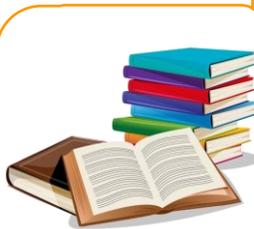

Important Terms Explained:

- **Roscosmos:** Russia's national space agency, responsible for the country's space science programs and missions, including lunar and planetary exploration.
- **International Lunar Research Station (ILRS):** A proposed joint Russia-China lunar base, designed to host scientific infrastructure and enable permanent human and robotic presence on the Moon.

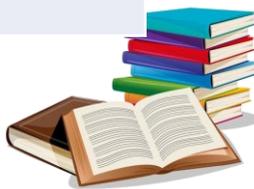

Important Terms Explained:

- **Nuclear Power for Space Missions:** Nuclear energy is preferred for space applications due to its reliability, long operational life, and ability to function during long lunar nights (which last about 14 Earth days), where solar power is inadequate.
- **Rosatom & Kurchatov Institute:** Russia's leading nuclear technology organizations, strongly indicating that the proposed Moon power plant will be nuclear-powered.

Tabular Summary:

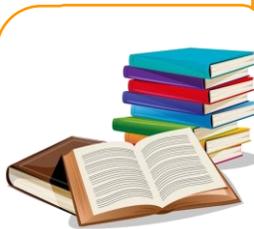

Parameter	Details
