Important Terms Explained:

- **Mission Mausam:** Mission Mausam is a **Government of India** programme aimed at modernising weather forecasting infrastructure through advanced observation networks, artificial intelligence-based forecasting, improved weather models, and high-resolution monitoring systems.

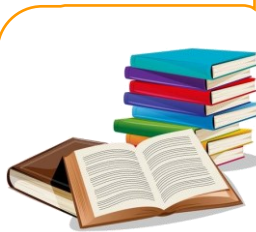

Important Terms Explained:

- **Radar Wind Profiler:** Radar Wind Profiler is an atmospheric monitoring instrument that continuously measures wind speed, wind direction, turbulence, vertical air movement, and boundary-layer dynamics.

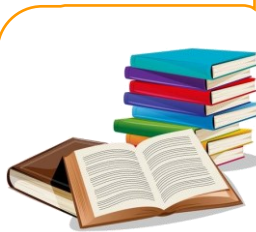

Important Terms Explained:

- **SODAR: SODAR** stands for **Sonic Detection and Ranging** and is used to study atmospheric conditions by using sound waves to measure wind profiles and turbulence in the lower atmosphere.

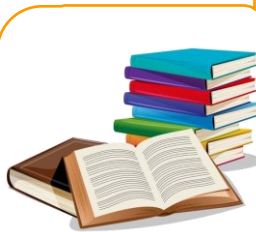

Important Terms Explained:

- **Microwave Radiometer:** Microwave Radiometer is a remote-sensing instrument that measures atmospheric temperature, moisture content, and related parameters useful for weather forecasting.

Important Terms Explained:

- **Lidar-Based Ceilometer:** Lidar-Based Ceilometer is an instrument that uses laser technology to monitor fog depth, cloud layers, vertical visibility, and atmospheric structure.

Tabular Summary:
