- How many H1N1 swine flu cases were reported in Delhi up to August 12, 2026, according to the NCDC data cited in the article?

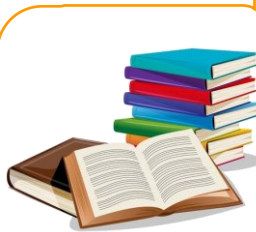

- A) 229
- B) 749
- C) 1,049
- D) 1,449
- E) 1,949

Answer
D) 1,449.

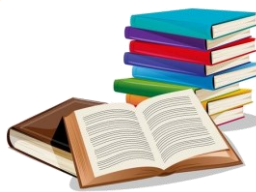

Event and Location:

- **Event:** Delhi reported a sharp rise in Influenza H1N1 cases, reaching **1,449** cases up to August **12, 2026**, compared with **229** cases during the same period last year.
- **Location:** The increase was reported in Delhi, with H1N1 also spreading in other Indian cities.
- **Date:** The cited H1N1 case count was recorded up to August **12, 2026**.

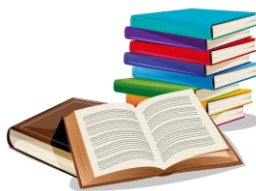

Mandates and Objectives:

- **Mandates:** Health monitoring focuses on tracking the increase in H1N1 infections and understanding factors such as viral mutations, seasonal conditions, population density and person-to-person transmission that may contribute to its spread.

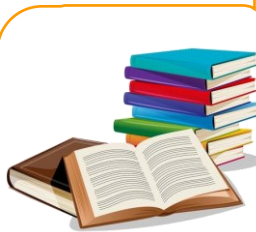

Mandates and Objectives:

- **Objectives:** The focus is to understand H1N1 transmission, identify vulnerable groups, promote timely medical care and highlight preventive measures such as seasonal influenza vaccination.

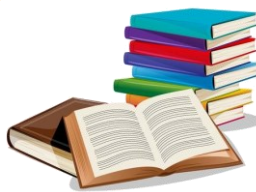

Important Terms Explained:

- **Influenza A virus:** It is a major type of influenza virus that can infect humans and several animal species and is capable of causing epidemics.

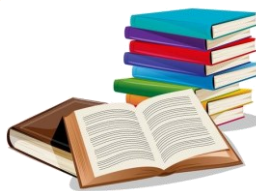

Important Terms Explained:

- **Hemagglutinin (H):** It is one of the major surface proteins of Influenza A viruses and is used, along with neuraminidase, to classify influenza subtypes.

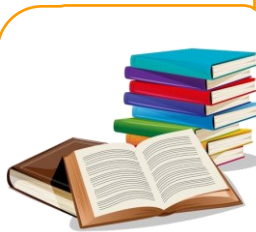

Important Terms Explained:

- **Neuraminidase (N):** It is another major surface protein of Influenza A viruses used in subtype identification, with H1N1 containing the H1 and N1 forms.

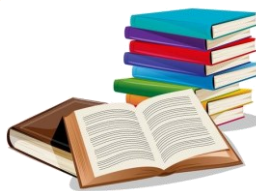

Important Terms Explained:

- **Antigenic drift:** It refers to small and gradual genetic mutations in influenza viruses during replication, which can alter their surface proteins and contribute to seasonal influenza outbreaks.

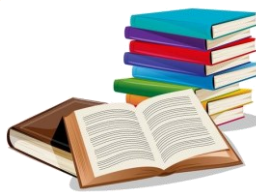

Important Terms Explained:

- **Antigenic shift:** It refers to an abrupt and major genetic change in Influenza A viruses that can create new combinations of viral surface proteins against which humans may have little or no prior immunity.

Important Terms Explained:

- **Oseltamivir:** It is an antiviral medicine that may be prescribed for influenza, particularly when treatment begins early or when patients belong to high-risk groups.

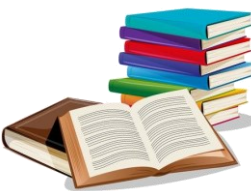

Tabular Summary:

Parameter	Details
Disease	H1N1 influenza, commonly known as swine flu, is a respiratory infection caused by an Influenza A virus.
Delhi cases	Delhi recorded 1,449 H1N1 cases up to August 12, 2026.
Previous-year comparison	The corresponding case count during the same period last year was 229.
Virus classification	Influenza viruses belong to the Orthomyxoviridae family and are classified into types A, B, C and D.
Possible spread factors	Seasonality, monsoon conditions, population density, human interaction and possible changes in circulating viral strains may influence transmission.
High-risk groups	Senior citizens, children, pregnant women, immunosuppressed individuals and people with certain chronic illnesses face greater risk of severe disease.
Treatment	Influenza does not respond to antibiotics, while antiviral medicines such as oseltamivir may be prescribed depending on severity and patient risk factors.
Prevention	Seasonal influenza vaccines are available and are regularly updated because circulating influenza viruses change over time.

- **Mandates:** The announced policy will provide eligible women government employees having a third child with **365** days of maternity leave instead of the earlier entitlement of **12** weeks, subject to conditions to be specified in a forthcoming government order.

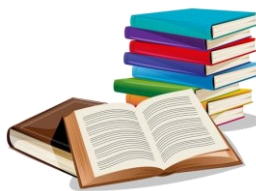

Mandates and Objectives:

- **Objectives:** The measure aims to strengthen women empowerment and social welfare by providing mothers with more time for post-childbirth recovery and infant care without requiring an immediate return to work.

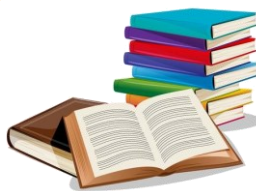

Important Terms Explained:

- **Government Order (GO):** It is an official administrative order issued by a government department that specifies the rules, eligibility conditions and implementation details of a policy decision.

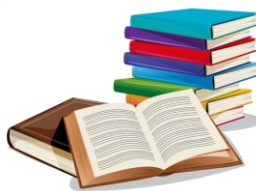

Important Terms Explained:

- **Surviving children:** The term refers to the number of living children of an employee and has been used under existing maternity leave rules to determine eligibility for different leave entitlements.

Important Terms Explained:

- **Women empowerment:** It refers to policies and measures aimed at improving women's social, economic and professional security, participation and well-being.

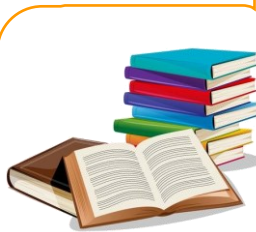

Tabular Summary:

Parameter	Details
Policy decision	Tamil Nadu announced 365 days of maternity leave for eligible women government employees having a third child.
Previous entitlement	Women government employees with two or more surviving children were earlier eligible for 12 weeks of maternity leave with full salary under applicable rules.
New entitlement	The announced third-child maternity leave period is 365 days.
Eligible category	The benefit is intended for women employees of the Tamil Nadu state government, subject to conditions in the forthcoming order.
2011 revision	Maternity leave was increased from 90 days to six months.
2016 revision	The leave period was extended to nine months.
2021 revision	In July 2021, maternity leave was increased to 365 days for women government employees with fewer than two surviving children.
Implementation	A government order is expected to specify the eligibility criteria and detailed implementation conditions for the 2026 decision.
