► By how many basis points did the US Federal Reserve raise the federal funds rate on 16 September 2026?

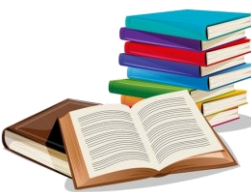

- A) 10 basis points
- B) 20 basis points
- C) 25 basis points
- D) 50 basis points
- E) 75 basis points

Answer
C) 25 basis points.

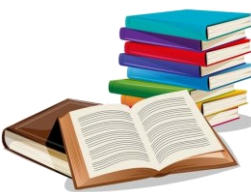

Event and Location:

- **Event:** The US **Federal Reserve** raised its benchmark federal funds rate by **25** basis points, taking the target range to **3.75%–4%**.
- **Location:** The monetary policy decision applies to the **United States**, with potential implications for global markets and economies including India.

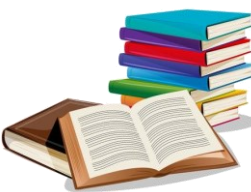

Event and Location:

- **Date: The Federal Reserve** announced the rate hike on **16 September 2026**.

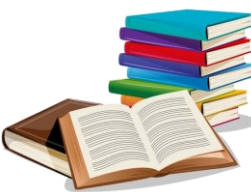

Mandates and Objectives:

- **Mandates: The Federal Open Market Committee (FOMC)** unanimously increased the federal funds target range by **25** basis points amid elevated inflation, while revised projections indicated the possibility of another quarter-point increase by the end of **2026**.

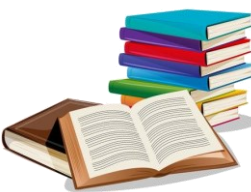

Mandates and Objectives:

- **Objectives:** The rate increase aims to restrain inflationary pressures and move inflation sustainably toward the **Federal Reserve's 2%** objective while considering economic growth and labour-market conditions.

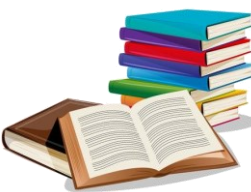

Important Terms Explained:

- **Federal Funds Rate:** It is the benchmark interest rate targeted by the **Federal Reserve** for overnight lending between eligible financial institutions and influences broader borrowing costs in the US economy.

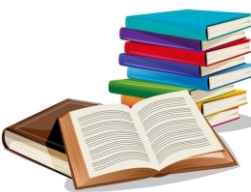

Important Terms Explained:

- **Basis Point:** One basis point equals **0.01 percentage** point, so a **25-basis-point** increase is equivalent to a **0.25 percentage-point** rise.

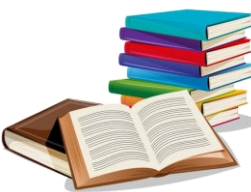

Important Terms Explained:

- **Personal Consumption Expenditures Inflation: PCE** inflation is a measure of changes in prices paid by US consumers and is a key inflation indicator monitored by the **Federal Reserve**.

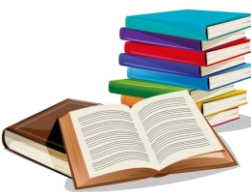

Important Terms Explained:

- **Repo Rate:** It is the interest rate at which the **Reserve Bank of India** lends short-term funds to commercial banks against eligible securities and is an important monetary policy tool.

Important Terms Explained:

- **Imported Inflation:** It refers to domestic price increases caused by higher costs of imported goods, often due to rising global commodity prices or depreciation of the domestic currency.

Tabular Summary:

Parameter	Details
Federal Reserve decision	The Federal Reserve raised its benchmark rate by 25 basis points.
New target range	The federal funds target range increased to 3.75%–4%.
Date of decision	The rate hike was announced on 16 September 2026.
Policy context	The move was the first Federal Reserve rate hike since July 2023 and the first policy move under Chairman Kevin Warsh.
Inflation projection	The Federal Reserve projected PCE inflation at 3.7% for 2026 and indicated a return to its 2% target by 2029.
Economic projections	US economic growth was projected at 2.3%, while unemployment was around 4.1%.
RBI position	The RBI had kept its repo rate unchanged at 5.25%, with its next MPC meeting scheduled for 5–7 October 2026.
Impact on India	Higher US rates can influence foreign capital flows, the rupee, imported inflation, stock and bond markets, borrowing conditions, and export demand.
